

Managed Portfolio Service | Cautious Higher Equity Portfolio

31 May 2020

Portfolio Management

The portfolio is managed through Brewin Dolphin's network of investment professionals. The asset allocation team meets monthly to decide upon the top-down strategy for the portfolio. Strict adherence to its recommendations ensures profits are taken regularly and risk is kept within appropriate levels. The fund research team is mandated to provide the building blocks for the portfolio with all funds having been carefully analysed to identify fund managers who can sustain enhanced returns while diversifying risk.

Portfolio Information

Inception Date	9 Sept 2019
Estimated Annual Yield	2.24
Initial Charges	Nil
Investment Management Charge (p.a.)	0.30%+VAT

For all other costs and charges please refer to your platform or the Brewin Dolphin OCF sales aid.

This historic information is not representative of individual client account performance and is provided for illustrative purposes only. Past performance to the launch date of this portfolio on 9 September 2019 is referenced against the actual performance of our Cautious Portfolio (launched in June 2009). Whilst the Cautious Higher Equity portfolio is less than 12 months old, we are not permitted to show the actual portfolio performance. Therefore, from the launch date of this portfolio we use the Investment Association Mixed Investment 0-35% Shares as a relevant performance reference.

Performance Since Inception

Performance Calculation: All income is reinvested. Performance is shown inclusive of underlying fund charges but gross of Brewin Dolphin's investment management charge. Deduction of this charge will have the result of reducing the illustrated performance. A platform charge is applicable. Please refer to your investment adviser or investment administrator for details.

Performance is calculated through Morningstar direct.

Market Commentary

Asset classes continued the April rally as both bonds and equities rose, reflecting the falling number of Covid-19 active cases and the easing of lockdown restrictions. Japan (+11.5%) was the standout equity market followed by the US (+7.8%). The sterling adjusted S&P 500 total return index turned positive for the year to date reflecting its resilience, despite the pandemic and oil crisis.

Almost all states in the US relaxed lockdown measures to some degree in May, despite infection rates being around 65% of the peak daily rates. With US unemployment reaching nearly 15% and expected to rise further, attention focused on the economy with Q2 earnings anticipated to fall circa 40%.

Q1 UK GDP fell 2% leading to the government extending the job retention scheme until October, albeit at a reduced rate from September. The UK commenced relaxation of the lockdown rules citing that whilst the R0 infection rate remained below 1, they would continue to ease restrictions.

Infection rates in Europe fell dramatically and the easing of restrictions continued afoot with the focus on the €750bn EU wide recovery plan, helping countries access funding without increasing their debt levels. The ECB continued its asset purchase programme acquiring €125bn of government and corporate bonds.

In May, government bond exposure was reduced in favour of corporate debt through the reduction of Insight UK Government All Maturities in favour of Robeco Global Credits, reflecting the valuation gap between gilts and investment grade.

Past performance is not a guide to future performance. The value of investments and any income from them can fall and you may get back less than you invested. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying asset.
