Performance Calculation: All income is reinvested. Performance is shown inclusive of underlying fund charges but gross of Brewin Dolphin's investment management charge. Deduction of this charge will have the result of reducing the illustrated performance.

Performance is calculated through Morningstar direct and provided for illustrative purposes only and should not be viewed as the performance of a specific client account. ¹Inception Date of 19/06/2009, quoted on an annualised basis. ²Benchmark change from composite to WMA Conservative as at 30/09/2012. Data for FTSE WMA indices to 28/02/2017. MSCI WMA indices from 01/03/2017.

Cautious Portfolio

The portfolio's objective is to provide outperformance of the Wealth Management Association (WMA) Conservative Index over the medium term. Returns will be generated through both capital growth and income, with a bias towards developed and liquid capital markets. The risk will be diversified by holding collective investments. The management of the portfolio aims to meet the objective conservatively by taking managed risk through fund selection and asset allocation.

Recent Activity

March was a difficult month for investors as the turbulence that began in February continued. Economic growth remains robust justifying an overweight to equities but with policy becoming less accommodating volatility is likely to remain elevated. This has heightened the market's reaction to an erratic US president and stock specific concerns over some of the most successful technology companies.

The weakness in tech stocks was a detractor from performance but these stocks remain healthy contributors over the first quarter. Real estate also slightly underperformed but selection was positive across all other regions with Europe being a highlight. Overall our asset allocation being underweight bonds was the biggest detractor but bond selection alone, following recent moves from corporates into sovereigns, more than compensated. Fund selection in alternatives and the UK also provided meaningful positive contributions.

Portfolio Information

Portfolio Benchmark	WMA Conservative Index Benchmark²
Investment Management Charge (p.a)	0.3%+VAT
Fund Underlying OCFs	0.53
Estimated Annual Yield	1.85

An Investment Administration Charge is applicable. Please refer to your investment adviser or investment administrator for details.

Portfolio Management

The management of the portfolio is achieved through Brewin Dolphin’s network of investment professionals. The group’s Asset Allocation Team meets monthly to decide upon the top down strategy for the portfolio. Strict adherence to its recommendations ensures that profits are taken regularly and keeps risks within appropriate levels.

The funds selected for the portfolio are taken from the group’s Fund Research Department. This team is mandated to provide the building blocks for successful portfolio management. All selected funds have been carefully analysed to identify fund managers who can sustain enhanced returns while diversifying risk.

Past performance is not a guide to future performance. The value of investments and any income from them can fall and you may get back less than you invested. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying asset.
